Mr. Bikeman

Below you will find the response from our directors concerning the bike ramp move request.

Some years ago the library bike rack was removed from the side of the building to the front so that it would be more visible yet not in the way of the patrons. We have checked with the library director (Robin Shader) and Risk Management Director (Eve Tooley) and the current location provides the safest and most secure location for the bike rack.

Jason

Please see the attached letter. It is a citizen requesting to move the bike rack from the library. He spoke to Teresa from Risk Management. He only provided an email as contact information: jimbikeman3@gmail.com

Please let me know if this is something you take care of.
